

Drones and Battery safety.

- 1 When somebody runs drone , **everybody** else wear glasses ! And don't go to drone near than 2 meters.
- 2 When command "Take off" is said **everybody** goes away from drone to safe distance*.
- 3 When drone touches down **nobody** go near to drone while command "Copter Disarmed" is said.
- 4 If you want change something in drone **firstly disconnect a battery**.
- 5 When you flight with copter , do all movements with sticks **slowly**.
- 6 **Don't leave** battery in drone. Put it in safety box**
- 7 Charge battery **only using calibrated checked charger** . (During charging process don't leave a room where it happened.
- 8 **Think before do !**

*- A metal isolated box .

** - Like IMAX B6 and others
