Which button are looking better first one or second one?

 alex5250 commented on 2 Jun • edited

Done by css.
So in FXML changed to:

```
<TextField fx:id="project_name" layoutX="18.0" layoutY="41.0" prefHeight="26.0" prefWidth="434.0" />
<TextField fx:id="project_path" layoutX="21.0" layoutY="97.0" prefHeight="26.0" prefWidth="278.0" />
<TextField fx:id="project_description" layoutX="14.0" layoutY="174.0" prefHeight="78.0" prefWidth="407.0" />
```

To

```
<TextField fx:id="project_name" layoutX="18.0" layoutY="41.0" prefHeight="26.0" prefWidth="434.0" styles
<TextField fx:id="project_path" layoutX="21.0" layoutY="97.0" prefHeight="26.0" prefWidth="278.0" styles
<TextField fx:id="project_description" layoutX="14.0" layoutY="174.0" prefHeight="78.0" prefWidth="407.0
```

And created a file text.css with styles off textfiled

```
.text-field {
    -fx-background-color: transparent ;
    -fx-border-width: 1 1 1 1; -fx-border-color: transparent transparent black transparent;
    -fx-border-style: solid;
}
.text-field:focused {
    -fx-border-width: 1 1 1 1; -fx-border-color: transparent transparent #141491 transparent;
}
```

Result:
